

ABOUT US

TollPlus, LLC began with a concept of providing complete software product solutions in Transportation. Our vision has evolved to provide a fully automated, end-to-end transportation solution that significantly improves revenue collection and efficiency while effectively lowering costs for our agency clients.

Driven by passion, a commitment to innovation, and use of the latest, cutting-edge technologies, we started product development in 2008. **The result is our best-in-class Toll Road Back Office System (ToP-BOS™), the industry's most comprehensive, scalable, secure, and customizable enterprise technology for toll road management.**

With its advanced technology and comprehensive capabilities, ToP-BOS is unmatched in its ability to reduce operating expenses and increase revenues on toll roads in the U.S. and around the world.

OUR PROMISE TO YOU

TollPlus has become a market leader providing back office systems and peripheral applications. We remain at our core focused on providing innovative solutions using best-in-class technology. Our world-class organization continues to be nimble and efficient, enabling us to consistently deliver affordable, high-value solutions to our customers.

WHY TOLLPLUS?

- Would you like to maximize your revenue collection capabilities?
- Do you want to decrease your hardware, hosting, and call center costs?
- Is your current system difficult to upgrade?
- Do you require 24x7x365 system availability and superior performance?
- Would migrating legacy data to a new system be a concern?
- Do you want to stay on the leading-edge of new, innovative technology that solves real-world problems?
- Is it imperative to provide your customers with real-time account access?
- Do you want more robust and flexible analytical capabilities?
- Is it important to integrate with other transportation partners such as airports and parking facilities?
- Is one of your goals to be eco-friendly / green?
